Reference letter for MASS Group

Our company experienced the fruitful collaboration with MASS Group starting from August 2008. Since that time MASS Group successfully delivered a number of outsource programming projects which allowed us to extend our services, significantly improve the reliability of existing functions and even to consolidate new markets.

Every project was delivered on time and according to our requirements, so we are very satisfied with this collaboration.

The valuable income of MASS Group to our business and operations management system was not limited with the outsource programming in Java. The Architect of MASS Group has been deeply involved in the building of overall system functional and technical architecture since October 2007. Such common efforts gave us in result the full functional system having the highest industry standard performance (more than 2 million messages/day) with low cost of ownership at the same time.

We found MASS Group as highly experienced professionals in server-side programming and related technologies, application of various integration approaches, as well as having the deep knowledge of telecommunication techniques and business operation.

Please don't hesitate to contact me in case of any questions.

About Zero9

Zero9 is a leading wireless media company that focuses on the creation, management, promotion and distribution of interactive contents and services for mobile phone users. Zero9, headquartered in Milan with offices in New York, Sao Paulo, Johannesburg and Rome, was founded by Raffaele Giovine in 2001.

Zero9 creates, manages, promotes and distributes interactive mobile content directly to consumers as well as offers mobile chats and virtual communities.

For years, thanks to Zero9, millions of mobile phone users have legally downloaded ringtones, videos and games and enjoyed the freedom to communicate and exchange messages (text, pictures) with others people all around the world.
